Hauke Petersen
Freie Universität Berlin

Research and Coding Interests

- Efficient embedded OSes
- Node/service discovery in the IoT
- RIOT:
  - porting
  - hardware abstraction
  - driver model

Wish List of Hackathon Topics

- automated export of SAUL devices as (g)CoAP resources
- integration of RIOT with CoAP-RD servers

Background

- MSc in Computer Engineering from DTU
- worked two years as Safety and Systems Engineer in the impeccable and trustworthy German car industry
